

Feature	Basic	Premium	Ultimate	Add-Ons
<b>Deep Freeze</b>				
Ensures Windows platform integrity	✓	✓	✓	✓
High availability and instant recovery of workstations	✓	✓	✓	✓
Optimized disk space utilization	✓	✓	✓	✓
Reduce IT tickets with simple reboot to fix issues	✓	✓	✓	✓
Thaw mode to retain important data	✓	✓	✓	✓
Windows update management	✓	✓	✓	✓
Schedule restarts, shutdown and other tasks	✓	✓	✓	✓
App data and user profile redirection	✓	✓	✓	✓
<b>Web-based Console</b>				
Do real time Deep Freeze on-demand actions from any web browser	✓	✓	✓	✓
Anytime, anywhere access from any Web enabled device	✓	✓	✓	✓
Supports 2-tier authentication with OTP	✓	✓	✓	✓
High availability with Amazon as the cloud platform	✓	✓	✓	✓
Enable and add new cloud based services with a single click	✓	✓	✓	✓
<b>Mobile App</b>				
Mobile App to Freeze and Thaw Deep Freeze workstations	✓	✓	✓	✓
iOS and Android apps for managing Deep Freeze workstations on the go	✓	✓	✓	✓
QR code login for admin login without password	✓	✓	✓	✓
Auto launch cloud console without entering credentials	✓	✓	✓	✓

Feature	Basic	Premium	Ultimate	Add-Ons
Push cloud agent on workstations without carrying install files	✓	✓	✓	✓
Force policy refresh on workstations without agent service restart	✓	✓	✓	✓
Create and tag workstations using the mobile app	✓	✓	✓	✓
<b>Unified Control Center</b>				
Centrally manage multiple sites across different locations using a single login	✓	✓	✓	✓
Centralized deployment for enabling all services	✓	✓	✓	✓
Remote management of workstations from anywhere and any device	✓	✓	✓	✓
Integrated monitoring of all services in a single view	✓	✓	✓	✓
Policy orchestration for desired configuration of services	✓	✓	✓	✓
Admin user role management for delegated access	✓	✓	✓	✓
Multisite management from single Web login and portal	✓	✓	✓	✓
Manage Windows and Mac end points from the same web portal	✓	✓	✓	✓
Enable tagging of objects for easy identification and logical grouping	✓	✓	✓	✓
Dashboard with real-time snapshot of all metrics	✓	✓	✓	✓
Upgrade all Faronics services with just one click	✓	✓	✓	✓
<b>Software Updater</b>				
Automatically install and update popular products across DF computers		✓	✓	✓
Built-in mechanism to control Thaw /Freeze Deep Freeze computers for updates		✓	✓	✓
Keep apps updated across all workstation with or without Deep Freeze installed		✓	✓	✓
Manage updates and new install of 90+ frequently updated third-party applications		✓	✓	✓

Feature	Basic	Premium	Ultimate	Add-Ons
<b>Cloud Sync</b>				
Use Google Drive or Dropbox as ThawSpace in the cloud		✓	✓	✓
Download only required files to eliminate unnecessary network bandwidth usage		✓	✓	✓
Direct integration with Deep Freeze		✓	✓	✓
Allow users to seamlessly access data stored on cloud		✓	✓	✓
Secure data from theft with Deep Freeze		✓	✓	✓
<b>Layered Security</b>				
Authorize applications to run		✓	✓	✓
Block shareware, ultrasurf, keylogger and phishing malware programs		✓	✓	✓
Block files based on hash value, digital signatures and publishers		✓	✓	✓
Authorize control over .exe, .dll, .com, .scr, .jar and .bat files		✓	✓	✓
Advanced intrusion protection		✓	✓	✓
Threat management with denial of services		✓	✓	✓
Data protection with restricted/controlled access		✓	✓	✓
Access management with time and user based policy		✓	✓	✓
Controlled lockdown of resources in Windows desktop		✓	✓	✓
Simplified GPO based user desktop lockdown		✓	✓	✓
Disable file extensions		✓	✓	✓
Printer and network access management		✓	✓	✓
One click to enable Kiosk mode		✓	✓	✓

Feature	Basic	Premium	Ultimate	Add-Ons
<b>Usage Stats</b>				
Monitor and report on computer usage		✓	✓	✓
Monitor and report on application usage		✓	✓	✓
Monitor and report on user logins and their associated computer usage		✓	✓	✓
Graphical dashboard that illustrates computer usage and top utilized applications		✓	✓	✓
Ensure compliance by monitoring software deployment and utilization			✓	✓
Select software products that can be monitored and managed right away			✓	✓
Graphical dashboard that illustrates top managed software, license utilization and compliance			✓	✓
Generate reports for over-deployed or under-utilized software			✓	✓
Generate reports that illustrate the usage of managed software			✓	✓
<b>Software Deployment</b>				
Create installation packages for custom software, using reported software inventory			✓	✓
Install, Upgrade and Uninstall custom software on target machines			✓	✓
Control deployment based on current version, license compliance, OS and architecture support			✓	✓
Auto flag Installer packages as outdated when newer version of software get detected			✓	✓
Remotely execute PowerShell, VB and Batch Scripts			✓	✓
Track Usage and installations of custom software with the closely integrated Managed Software Service			✓	✓
<b>Windows Update</b>				
Simplify the complex task of delivering and managing Windows updates			✓	✓
Manage Windows updates on Deep Freeze and Non-Deep Freeze machines			✓	✓

Feature	Basic	Premium	Ultimate	Add-Ons
Reporting of critical updates, install statuses, failed updates, vulnerability updates and more			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Options to automate and install only approved Windows updates			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Vulnerabilities and missing patches dashboard			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Schedules through custom policies, or with on demand tasks			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Download updates on a centralized computer and distribute across the network			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Incident Reporting</b>				
Anonymous and non-anonymous reporting of incidents from managed workstations			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Specified contacts receive incident reports via email			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Reported incidents may be exported or viewed in a report			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Power Management</b>				
Intelligent power management by monitoring CPU, network, and disk activity			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Eliminate computer energy waste without affecting productivity			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Audit Mode provides a baseline measure of consumed energy and shows projected annual savings			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Energy savings translate into reduced carbon footprint that leads to environmental benefits			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Create Energy Consumption Profiles to fine tune individual workstation power use			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Generate energy use and savings reports based upon your regional electricity cost			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Generate reports on best/worst energy savers, and power saving history			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Imaging</b>				
Modular file based OS deployment			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Capture, deploy one golden image on varied hardware			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Feature	Basic	Premium	Ultimate	Add-Ons
PXE booting with existing WDS infrastructure			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Custom install settings including disk partitions and express OOBE			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Mass deployment of operating systems across the network			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Multiple driver groups for different hardware types			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Remote Connect</b>				
Remotely connect to managed workstations from any location			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Native RDP protocol for maximum security			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Interact with remote desktops just like a local PC			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Access corporate infrastructure from anywhere over the web			<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Anti-Virus Endpoint Protection</b>				
Comprehensive protection with Antivirus, Anti-Spyware, Anti-Rootkit				<input checked="" type="checkbox"/>
Built-in firewall protection				<input checked="" type="checkbox"/>
Email and web security				<input checked="" type="checkbox"/>
Multi layer detection with heuristics, behavioral analysis, signature detections.				<input checked="" type="checkbox"/>
Advanced MX-Virtualization technology for real-time malware analysis				<input checked="" type="checkbox"/>
Central management of Anti-Virus updates				<input checked="" type="checkbox"/>
Seamless integration with Deep Freeze workstation				<input checked="" type="checkbox"/>
<b>Deep Freeze Mac</b>				
Ensures Mac platform integrity				<input checked="" type="checkbox"/>
High availability and instant recovery of Mac workstations				<input checked="" type="checkbox"/>

Feature	Basic	Premium	Ultimate	Add-Ons
Optimized disk space utilization				✓
Reduce IT tickets with simple reboot to fix issues				✓
Create ThawSpaces to retain important data				✓
Schedule Apple software updates, restarts, shutdown and other tasks				✓
App data and user profile redirection				✓
<b>Mobile Device Management</b>				
Manage iOS, Android and Chromebook's from the same web console				✓
Install apps remotely from Google Play Store or Apple App Store				✓
Support for Apple VPP and Android for Work				✓
Integration with Apple DEP, Android Enterprise and Chrome Device Management				✓
Restrict Bluetooth, Wi-Fi Direct (SAFE 2+), MDM-provisioned Wi-Fi and VPN configurations				✓
Remotely lock, unlock or disable devices in case devices are stolen or compromised				✓
Support for Bring Your Own Device (BYOD)				✓
Remotely send messages to selected devices from the console				✓
Gather location information from the device's GPS down to street-level accuracy				✓
